

18TH CONFERENCE OF THE INTERNATIONAL WORKGROUP FOR PALAEOETHNOBOTANY

ERC PROJECT AND ARCHAEOBOTANY

Archaeology, and specifically Archaeobotany, has been very successful over the years and secured several ERC grants at different level. The objective of this workshop is to sum up the last few years of accrued experience of archaeobotanists as PIs or panel members. The workshop will bring together a group of colleagues that were or are PIs in a starting, consolidator or advanced grant to discuss:

- 1) Their experience in preparing the grants and building the necessary network
- 2) Selection procedures
- 3) Administrative and management issues
- 4) Suggestions for future applicants

At the same time the workshop will showcase a few projects that are currently ongoing or that recently finished.

The workshop will be co-managed by Amy Bogaard, Dorian Fuller, Sultana Maria Valamoti, Leonor Pena Chocarro and Carla Lancelotti
